

36" Imaging Extension with 2" pad

BF00258

The Imaging Extension features metal-free radiolucent beveled edges for 360° imaging and increases upper or lower body imaging of up to 55 inches. This 36-inch long accessory broadens the surgical capabilities of STERIS general surgical tables for cardiovascular, AV fistulas, pain management, and other procedures requiring the enhanced imaging ability typically found on image guided surgical tables.

Includes 2-inch pad with hook and loop fasteners.

Patient weight capacity: Tabletop with slide induced: 350 lbs (159 kg), Tabletop centered: 500 lbs (227 kg)

To be used with US side rails
