

## Bariatric Fluid Collection System

BF56

The Bariatric Fluid Collection System includes adapters so the drape support can be attached to the Bariatric Width Extenders. It comes with the flexible drape support and a fluid collection bag. The flexible drape support device quickly attaches to the end of the table seat section during set up. Both the Sterile and Non-sterile Fluid Collector Bags fit either the standard or Bariatric model drape support. The built-in flexible drain hose works with a kick bucket or a suction canister.

Set of 10 Fluid Collection Bags: Sterile (BF458) or Non-Sterile (BF459) must be ordered.

Not CE marked product

To be used only with US side rails
