

Micro-Surgical Arm and Hand Table

This table provides stability and surgeon access with ample working space for when performing vascular and orthopedic procedures on hands or arms. Table top is constructed of carbon fiber material allowing for imaging of the extremity and lightweight placement on the surgical table. Elbow rests reduce surgeon fatigue during lengthy procedures. Support leg for micro-surgical stability. Distal end rail enables arm and hand traction.

2" pad included.

Requires 2 x clamps for round posts (BF161, BF10, BF083)

Dimensions: 26"W x 34"L.

To be used with US rails only

COMPATIBLE WITH

5085 SRT - 4095 - 5095 - 7080
