

Automatic Rotary Clamp - CMAX XRay

TAB788

The Rotary Socket for the CMAX X-Ray is ideal for mounting accessories with round posts up to $\frac{3}{4}$ " diameter anywhere along the table's perimeter where there is no siderail. The Rotary Socket provides height and angle control with one handle. The single lever simplifies attachment and quick removal of accessories. The socket adjustment permits multi-planer accessories to be installed and secured at any angle.
