

Patient Transfer Board, Short, Narrow

BF40

STERIS Patient Transfer Boards are roller-free roller boards that are better for patients and easier on nurses. They enable easy transfer of patients to or from the surgical table. They feature a soft core with no hard metal rollers. No lifting is required, even for the heaviest of patients. The longer boards are foldable and allow for easy transfer in Beach Chair (Fowler's) position. Shorter boards allow for easy transfer in supine or lateral positions.

Dimensions: 40" x 16.5"

Patient Weight Capacity: 500 lbs (227 kg)

Product not CE marked
